

COURSE CARD

1. Basic information

Course name in English:	Advanced Topics in Artificial Intelligence	
Course name in Polish:	Zaawansowane zagadnienia sztucznej inteligencji	
Number of hours:	30	
Type of course:	Elective course	
Form of course:	Lecture	
Code of course:		
Course leader:	Marek Klonowski	
Faculty of the course leader:	Faculty of Information and Communication Technology	
Email address of the course leader:	Marek.Klonowski@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	☐
	Automation, electronic, electrical engineering and space technologies	☐
	Information and communication technology	☒
	Biomedical engineering	☐
	Chemical engineering	☐
	Civil engineering, geodesy and transport	☐
	Materials engineering	☐
	Mechanical engineering	☐
	Environmental engineering, mining, and energy	☐
	Mathematics	☐
	Chemical sciences	☐
	Physical sciences	☐
	Management and quality studies	☐

2. Objectives

An overview of selected current trends in Artificial Intelligence, with particular emphasis on research conducted at Wrocław University of Science and Technology.

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Introduction: Perspectives and Directions of AI	2	Lecture
2	Module 1: AI in Complex Networks	6	Select form
3	Module 2: Advanced Methods of Representation Learning	4	Select form
4	Module 3: Advanced Methods of Generative Artificial Intelligence	6	Select form
5	Module 4: Advanced NLP Methods	4	Select form
6	Module 5: Security in AI and AI for Security	4	Select form
7	Module 6: Affective AI	4	Select form
8			Select form
9			Select form
10			Select form
11			Select form
12			Select form
13			Select form
14			Select form
15			Select form

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

Successful completion of an advanced course in Artificial Intelligence is required, as well as at least a basic course in probability theory, discrete mathematics, and machine learning. Proficiency in programming is also essential.

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	<i>KNOWLEDGE. Doctoral student knows and understands:</i>	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	X
SzD_W4	research methodology;	X
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	☐
SzD_W6	the fundamental dilemmas of modern civilization;	☐
SzD_W7	the legal and ethical conditions of scientific activity;	☐
SzD_W8	the economic and other relevant conditions of scientific activity;	☐
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	☐
	<i>SKILLS. Doctoral student is able to:</i>	

SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	X
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	☐
SzD_U4	disseminate research results, including in popular forms;	☐
SzD_U5	initiate debates and participate in a scientific discourse;	X
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	☐
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	☐
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	☐
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	☐
	<i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>	
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	X
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	☐

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

Each participant is required to choose three out of six modules to be completed. Completion of a module consists of answering questions related to the material, either in written or oral form. The final grade is the average of the grades obtained in the selected modules. In addition, attendance in the remaining modules is mandatory.

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

The primary teaching method will be multimedia presentations, often enriched by discussions with the participants.

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

There is no specific literature list. The instructor of each module will present several selected, up-to-date publications addressing the key issues covered by the given module during its delivery.

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

English.
