

COURSE CARD

1. Basic information

Course name in English:	Materials engineering in construction processes	
Course name in Polish:	Inżynieria materiałów w procesach konstrukcyjnych	
Number of hours:	30	
Type of course:	Elective course	
Form of course:	mixed forms (combination of lecture, seminar and laboratory)	
Code of course:		
Course leader:	Łukasz Sadowski	
Faculty of the course leader:	W2 Faculty of Civil Engineering	
Email address of the course leader:	lukasz.sadowski@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	☒
	Automation, electronic, and electrical engineering	☒
	Information and communication technology	☐
	Biomedical engineering	☒
	Chemical engineering	☒
	Civil engineering and transport	☒
	Mechanical engineering	☒
	Environmental engineering, mining, and energy	☒
	Mathematics	☐
	Chemical sciences	☒
	Physical sciences	☐
	Management and quality studies	☐

2. Objectives

1. To acquaint with the principles of construction materials technologies in engineering.
2. To acquaint with the principles of adhesive bonding in materials engineering.
3. To acquaint with the principles of surface treatment of construction materials.
4. To gain skills of writing a section "materials" in the preparation of scientific publications.
5. To acquaint with the principles of laboratory methods used in materials characterization.
6. To acquaint with the principles of field methods used in materials characterization.
7. To acquaint with the principles of multi-scale characterization of materials in engineering.
8. To gain skills necessary to prepare and write a section "methods" in the preparation of scientific publications.

9. To gain basic knowledge in the field of the presentation and visualization of the obtained results in materials and construction engineering.

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Construction materials technologies in engineering (cement-based materials, metals, polymers, ceramic materials, composite materials)	4	lecture
2	Adhesive bonding in materials engineering (theory of adhesion, methods, adhesive families and selection, applications and quality control, joint design)	2	lecture
3	Surface treatment of construction materials (methods, surface parameters, applications)	2	lecture
4	Preparation of a section "materials" for scientific publications	2	lecture
5	Laboratory methods used in materials characterization (optical methods, microscopic methods, radiographic methods, calibration, reliability of testing). Lecture and group discussion	4	lecture
6	Field methods used in materials characterization (semi-destructive testing methods, non-destructive testing methods, complementary use of methods)	2	lecture
7	Multi-scale characterization of materials in engineering (conception of multi-scale approach, examples and application)	2	lecture
8	Preparation of a section "methods" for scientific publications	2	lecture
9	Presentation and visualization of the obtained results in materials and construction engineering (drawing scientific charts, role of graphical abstract)	2	lecture
10	Delivering a multimedia presentation on a selected topic related to materials engineering in construction processes	6	seminar
11	Preparation of final report	-	Select form
12	Review of final report	2	seminar
13	Total hours	30	Select form

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

1. Having a basic knowledge of a given discipline at the second level of studies.
2. Having a predefined research topic related to realized PhD thesis.

3. Having a basic knowledge on construction materials.

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	☒
SzD_W4	research methodology;	☐
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	☐
SzD_W6	the fundamental dilemmas of modern civilization;	☒
SzD_W7	the legal and ethical conditions of scientific activity;	☐
SzD_W8	the economic and other relevant conditions of scientific activity;	☐
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	☐
	SKILLS. Doctoral student is able to:	
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	☒
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	☒
SzD_U4	disseminate research results, including in popular forms;	☒
SzD_U5	initiate debates and participate in a scientific discourse;	☐
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	☐
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	☒
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	☐
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	☐
	SOCIAL COMPETENCES. Doctoral student is ready to:	

SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	☐
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	☒

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

Preparation of final report, delivering a presentation, activity in group discussion

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

Lecture, presentation, discussion, self work

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

1. Gonçalves, M. C., & Margarido, F. (2015). Materials for construction and civil engineering. Cham, Switzerland: Springer.
2. Sadowski, Ł. (2019). Adhesion in Layered Cement Composites. Cham, Switzerland: Springer.
3. Sadowski, Ł., & Hoła (2022) J. Non-Destructive Diagnostics of Concrete Floors: Methods and Case Studies. Boca Raton, CRC Press.
4. Mathia, T. G., Pawlus, P., & Wieczorowski, M. (2011). Recent trends in surface metrology. Wear, 271(3-4), 494-508.
5. Sadowski, Ł., Hoła, J., Czarnecki, L., & Mathia, T. G. (2021). New paradigm in the metrology of concrete surface morphology: Methods, parameters and applications. Measurement, 169, 108497.
6. Literature related to a particular scientific discipline.

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

Course in English, own laptop is welcome
