Wrocław University of Science and Technology
Doctoral School

COURSE CARD

1. Basic information

Course name in English:	Interdysciplinary seminar on new materials	
Course name in Polish:	Interdyscypinarne seminarium o nowych materiałach	
Number of hours:	15	
Type of course:	Elective course	
Form of course:	seminar	
Code of course:		
Course leader:	Dr hab. inż. Katarzyna Matczyszyn	
Faculty of the course leader:	W3 Faculty of Chemistry	
Email address of the course leader:	Katarzyna.matczyszyn@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	☒
	Automation, electronic, electrical engineering and space technologies	☒
	Information and communication technology	☒
	Biomedical engineering	☒
	Chemical engineering	☒
	Civil engineering, geodesy and transport	☒
	Materials engineering	☒
	Mechanical engineering	☒
	Environmental engineering, mining, and energy	☒
	Mathematics	☒
	Chemical sciences	☒
	Physical sciences	☒
	Management and quality studies	☒

2. Objectives

The main scope of the course is to share modern knowledge about the new materials developed by various chemical and physical methods which find application in the contemporary technologies. The course aims also to help the student advance the presenters skills both for the specialists in the discipline as well as to the general audience

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Introduction to the course, presentation of the research of the teacher	1	seminar

2	Presentation by the student 1 and 2, discussion based on the results.	2	seminar
3	Presentation by the student 3 and 4, discussion based on the results.	2	seminar
4	Presentation by the student 5 and 6, discussion based on the results.	2	seminar
5	Presentation by the student 7 and 8, discussion based on the results.	2	seminar
6	Presentation by the student 9 and 10, discussion based on the results.	2	seminar
7	Presentation by the student 11 and 12, discussion based on the results.	2	seminar
8	Presentation by the student 13 and 14, discussion based on the results.	2	seminar

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

None.

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	☒
SzD_W4	research methodology;	☒
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	☐
SzD_W6	the fundamental dilemmas of modern civilization;	☒
SzD_W7	the legal and ethical conditions of scientific activity;	☐
SzD_W8	the economic and other relevant conditions of scientific activity;	☐
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	☐
	SKILLS. Doctoral student is able to:	
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively,	☒

	- draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	☒
SzD_U4	disseminate research results, including in popular forms;	☒
SzD_U5	initiate debates and participate in a scientific discourse;	☒
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	☒
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	☐
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	☐
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	☒
	SOCIAL COMPETENCES. Doctoral student is ready to:	
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	☐
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	☒

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

The course will be evaluated based on the active participation of the students and giving two types of presentation in the field of their scientific activity – long and detailed one for the non-specialists and a short, conference type one.
The mark will be based on the presentation quality – its clarity and elegance as well as on the active discussion: general discussion, questions, exchange of the ideas related to the seminar topics.

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

The course will be based on the multimedia presentation given by teacher as well as by the course participants and discussion around the leading theme. Will require also studies for proper subject presentation

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

9. Other remarks

Additional remarks, comments, (e.g., language of the course)
