

## COURSE CARD

### 1. Basic information

|  |   |                                     |
|--|---|-------------------------------------|
| Course name in English:  | Microsystems and Microengineering                                     |                                     |
| Course name in Polish:   | Mikrosystemy i Mikroinżynieria  |                                     |
| Number of hours:   | 30  |                                     |
| Type of course:  | Elective course   |                                     |
| Form of course:  | lecture   |                                     |
| Code of course:  | ...   |                                     |
| Course leader:   | Prof. Rafał Walczak   |                                     |
| Faculty of the course leader:  | W12 Faculty of Electronics, Photonics and Microsystems                |                                     |
| Email address of the course leader:  | rafal.walczak@pwr.edu.pl  |                                     |
| Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course): | Architecture and urban planning                                       | <input type="checkbox"/>            |
|  | Automation, electronic, electrical engineering and space technologies | <input checked="" type="checkbox"/> |
|  | Information and communication technology                              | <input checked="" type="checkbox"/> |
|  | Biomedical engineering  | <input type="checkbox"/>            |
|  | Chemical engineering  | <input type="checkbox"/>            |
|  | Civil engineering, geodesy and transport                              | <input type="checkbox"/>            |
|  | Materials engineering   | <input type="checkbox"/>            |
|  | Mechanical engineering  | <input type="checkbox"/>            |
|  | Environmental engineering, mining, and energy                         | <input type="checkbox"/>            |
|  | Mathematics   | <input type="checkbox"/>            |
|  | Chemical sciences   | <input type="checkbox"/>            |
|  | Physical sciences   | <input type="checkbox"/>            |
| Management and quality studies   | <input type="checkbox"/>  |                                     |

### 2. Objectives

Familiarizing with the newest technical and technological trends related to microsystems and microengineering

Analyse and discussion about actual and developing fields of application of microsystems in research and industry.

### 3. Content

*Detailed information about the course content, including topics and form of classes.*

| No. | Topic                               | Number of hours | Form of classes |
|-----|-------------------------------------|-----------------|-----------------|
| 1   | Introduction to microsystems (MEMS) |                 | lecture         |
| 2   | Microengineering in mems technique  |                 | lecture         |

|    |  |  |         |
|----|--|--|---------|
| 3  | 3D printing for MEMS                       |  | lecture |
| 4  | 4D printing                                |  | lecture |
| 5  | Printed electronics                        |  | lecture |
| 6  | Automotive microsystems                    |  | lecture |
| 7  | Analytical microsystems                    |  | lecture |
| 8  | Microsystems for medicine                  |  | lecture |
| 9  | Optical microsystems                       |  | lecture |
| 10 | Micromechatronics and micromachines        |  | lecture |
| 11 | MEMS for energy harvesting                 |  | lecture |
| 12 | MEMS for IoT and Industry 4.0              |  | lecture |
| 13 | Vacuum MEMS                                |  | lecture |
| 14 | Space MEMS                                 |  | lecture |
| 15 | Review of worldwide market of microsystems |  | lecture |

#### 4. Prerequisites

*List of prerequisites relating to knowledge, skills and other competences for course participants.*

Knowledge about state-of-the-art and new trends of modern electronics and microsystems technique. Ability to improve competences in interdisciplinary fields of science and research

#### 5. Learning outcomes

*List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).*

| Symbol | Learning outcome   |                                     |
|--------|--|-------------------------------------|
|        | <b>KNOWLEDGE. Doctoral student knows and understands:</b>  |                                     |
| SzD_W3 | the main trends in the development of the scientific or artistic disciplines covered in the curricula;   | <input checked="" type="checkbox"/> |
| SzD_W4 | research methodology;  | <input type="checkbox"/>            |
| SzD_W5 | the rules for the dissemination of scientific results, including in open access mode;  | <input type="checkbox"/>            |
| SzD_W6 | the fundamental dilemmas of modern civilization;   | <input type="checkbox"/>            |
| SzD_W7 | the legal and ethical conditions of scientific activity;   | <input type="checkbox"/>            |
| SzD_W8 | the economic and other relevant conditions of scientific activity;   | <input checked="" type="checkbox"/> |
| SzD_W9 | basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.   | <input type="checkbox"/>            |
|        | <b>SKILLS. Doctoral student is able to:</b>  |                                     |
| SzD_U2 | use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular:<br>- define the purpose and subject of scientific research, formulate a research hypothesis,<br>- develop research methods, techniques and tools, and use them creatively, | <input checked="" type="checkbox"/> |

|        |   |                                     |
|--------|---|-------------------------------------|
|        | - draw conclusions on the basis of scientific research;<br>critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development;<br>transfer the results of scientific activities to the economic and social spheres;  |                                     |
| SzD_U3 | communicate on specialised topics to the extent that they enable an active participation in the international scientific community;   | <input checked="" type="checkbox"/> |
| SzD_U4 | disseminate research results, including in popular forms;   | <input checked="" type="checkbox"/> |
| SzD_U5 | initiate debates and participate in a scientific discourse;   | <input type="checkbox"/>            |
| SzD_U6 | be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;   | <input checked="" type="checkbox"/> |
| SzD_U7 | plan and implement an individual or collective research or creative activity, including in an international environment;  | <input checked="" type="checkbox"/> |
| SzD_U8 | independently plan and act for one's own development and inspire and organize the development of others;  | <input type="checkbox"/>            |
| SzD_U9 | plan classes or groups of classes and implement them using modern methods and tools.  | <input type="checkbox"/>            |
|        | <i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>  |                                     |
| SzD_K3 | fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;  | <input checked="" type="checkbox"/> |
| SzD_K4 | maintaining and developing the ethos of research and creative environments, including:<br>- carrying out scientific activities in an independent manner,<br>- respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection. | <input checked="" type="checkbox"/> |

## 6. Evaluation

*Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.*

Individual final written work (2 page in the form of conference abstract) on potential application of microsystems in students research works.

## 7. Teaching methods

*Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.*

Multimedia presentation followed with discussion on the lectures subjects.

## 8. Literature

*List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.*

R. Walczak, Laboratoria chipowe z detekcją optyczną, konstrukcja, technologia i przykłady wykorzystania, Oficyna Wydawnicza PWr, 2014

Scientific journals in the field: Journal of Micromechanics and Microengineering, Sensors and Actuators A/B, LabChip Journal, Micromachines, BioChip Journal etc

## 9. Other remarks

*Additional remarks, comments, (e.g., language of the course)*

Language of the course – English.
