2. Objectives

C1 Acquisition of advanced knowledge on current trends in condensed matter and optics

C2 Acquisition of skills of presenting scientific seminar in English

C3 Acquisition of skills of scientific discussion in English

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Торіс	Number of	Form of classes
		hours	
1	Introduction to seminar subject. Discussion of seminar	1	seminar
	presentation and evaluation.		
2	PhD students seminar presentations. Discussion.	1	seminar

Wrocław University of Science and Technology Doctoral School

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

- 1. Basic knowledge in quantum mechanics, solid state physics and optics
- 2. Linear algebra and mathematic analysis skills
- 3. Competences in self work]

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered	
	in the curricula;	
SzD_W4	research methodology;	\boxtimes
SzD_W5	the rules for the dissemination of scientific results, including in open access	
	mode;	
SzD_W6	the fundamental dilemmas of modern civilization;	
SzD_W7	the legal and ethical conditions of scientific activity;	
SzD_W8	the economic and other relevant conditions of scientific activity;	
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and	
	commercialisation of results of scientific activity and know-how related to these	
	results.	
	SKILLS. Doctoral student is able to:	
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular:	

Wrocław University of Science and Technology

Doctoral School

	- define the purpose and subject of scientific research, formulate a research	
	hypothesis,	
	- develop research methods, techniques and tools, and use them creatively,	
	 draw conclusions on the basis of scientific research; 	
	critically analyse and evaluate the results of scientific research, expertise and	
	other creative work and their contribution to knowledge development;	
	transfer the results of scientific activities to the economic and social spheres;	
SzD_U3	communicate on specialised topics to the extent that they enable an active	\boxtimes
	participation in the international scientific community;	
SzD_U4	disseminate research results, including in popular forms;	\boxtimes
SzD_U5	initiate debates and participate in a scientific discourse;	\boxtimes
SzD_U6	be able to speak a foreign language at B2 level of the Common European	
	Framework of Reference for Languages to a level that enables them to participate	
	in the international scientific and professional environment;	
SzD U7	plan and implement an individual or collective research or creative activity,	
_	including in an international environment;	
SzD_U8	independently plan and act for one's own development and inspire and organize	
	the development of others;	
SzD_U9	plan classes or groups of classes and implement them using modern methods and	
	tools.	
	SOCIAL COMPETENCES. Doctoral student is ready to:	
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest	
	activities, thinking and acting in an entrepreneurial way;	
SzD_K4	maintaining and developing the ethos of research and creative environments,	
	including:	
	- carrying out scientific activities in an independent manner,	
	- respecting the principle of public ownership of research results, taking into	
	account the principles of intellectual property protection.	
	•	

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

presentation

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

Multimedia presentation, discussion

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

Research papers

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

English
