

## COURSE CARD

### 1. Basic information

Course name in English:	Sensors of physical quantities	
Course name in Polish:	Czujniki wielkości fizycznych	
Number of hours:	15	
Type of course:	Elective course	
Form of course:	lecture	
Code of course:		
Course leader:	<i>Dr hab. Andrzej Szczurek, prof. PWr</i>	
Faculty of the course leader:	W7 Faculty of Environmental Engineering	
Email address of the course leader:	andrzej.szczurek@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	<input type="checkbox"/>
	Automation, electronic, electrical engineering and space technologies	<input type="checkbox"/>
	Information and communication technology	<input type="checkbox"/>
	Biomedical engineering	<input type="checkbox"/>
	Chemical engineering	<input type="checkbox"/>
	Civil engineering, geodesy and transport	<input type="checkbox"/>
	Materials engineering	<input type="checkbox"/>
	Mechanical engineering	<input type="checkbox"/>
	Environmental engineering, mining, and energy	<input checked="" type="checkbox"/>
	Mathematics	<input type="checkbox"/>
	Chemical sciences	<input type="checkbox"/>
	Physical sciences	<input type="checkbox"/>
Management and quality studies	<input type="checkbox"/>	

### 2. Objectives

The course provides information about the operation principles of sensors of various physical quantities and their applications.

### 3. Content

*Detailed information about the course content, including topics and form of classes.*

No.	Topic	Number of hours	Form of classes
1	Introduction	1	lecture
2	Principle of sensor operation, measurement system	2	lecture
3	Temperature sensors	2	lecture

4	Humidity sensors	2	lecture
5	Velocity and flow sensors	2	lecture
6	Pressure sensors	2	lecture
7	Sound sensors and vibration sensors	2	lecture
8	Assignment	2	seminar

#### 4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

Basic knowledge concerning measurement of physical and chemical properties of the matter

#### 5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	<i>KNOWLEDGE. Doctoral student knows and understands:</i>	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	<input type="checkbox"/>
SzD_W4	research methodology;	<input checked="" type="checkbox"/>
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	<input type="checkbox"/>
SzD_W6	the fundamental dilemmas of modern civilization;	<input type="checkbox"/>
SzD_W7	the legal and ethical conditions of scientific activity;	<input type="checkbox"/>
SzD_W8	the economic and other relevant conditions of scientific activity;	<input type="checkbox"/>
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	<input type="checkbox"/>
	<i>SKILLS. Doctoral student is able to:</i>	
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	<input type="checkbox"/>
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	<input checked="" type="checkbox"/>
SzD_U4	disseminate research results, including in popular forms;	<input type="checkbox"/>
SzD_U5	initiate debates and participate in a scientific discourse;	<input type="checkbox"/>

SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	<input type="checkbox"/>
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	<input type="checkbox"/>
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	<input type="checkbox"/>
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	<input type="checkbox"/>
<i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>		
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	<input type="checkbox"/>
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	<input checked="" type="checkbox"/>

## 6. Evaluation

*Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.*

Learning outcomes of the course are judged based on a report and presentation, prepared individually by each participant

## 7. Teaching methods

*Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.*

The principal teaching method is the spoken lecture illustrated by multimedia presentation and thematic discussion.

## 8. Literature

*List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.*

1. J. Piotrowski, , Pomiary czujniki i metody pomiarowe wybranych wielkości fizycznych i składu chemicznego; Wydawnictwo Naukowe PWN, 2017.
2. J. Fraden, Handbook of Modern Sensors, Physics, Designs and Application, Fourth ed., Springer New York Heidelberg, 2010.
3. S. Soloman, Sensors Handbook, McGraw-Hill Companies, Inc., New York, 2010.
4. Sensors and Actuators A: Physical, Elsevier,  
<https://www.sciencedirect.com/journal/sensors-and-actuators-a-physical>
5. Sensors, MDPI, <https://www.mdpi.com/journal/sensors>

## 9. Other remarks

*Additional remarks, comments, (e.g., language of the course)*

Language of the course is English
