

COURSE CARD

1. Basic information

Course name in English:	Advances in statistics and forecasting	
Course name in Polish:	Wprowadzenie statystyka i prognozowanie	
Number of hours:	30	
Type of course:	Elective course	
Form of course:	lecture	
Code of course:	NZQ100392W/W08NZJ-SD0098W	
Course leader:	<i>Dr Katarzyna Maciejowska</i>	
Faculty of the course leader:	W8 Faculty of Management	
Email address of the course leader:	Katarzyna.maciejowska@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	<input checked="" type="checkbox"/>
	Automation, electronic, and electrical engineering	<input checked="" type="checkbox"/>
	Information and communication technology	<input checked="" type="checkbox"/>
	Biomedical engineering	<input checked="" type="checkbox"/>
	Chemical engineering	<input checked="" type="checkbox"/>
	Civil engineering and transport	<input checked="" type="checkbox"/>
	Mechanical engineering	<input checked="" type="checkbox"/>
	Environmental engineering, mining, and energy	<input checked="" type="checkbox"/>
	Mathematics	<input checked="" type="checkbox"/>
	Chemical sciences	<input checked="" type="checkbox"/>
	Physical sciences	<input checked="" type="checkbox"/>
	Management and quality studies	<input checked="" type="checkbox"/>

2. Objectives

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Introduction: random variable and its properties	2	lecture
2	Graphical presentation of data, descriptive statistics	2	lecture
3	Distribution approximation: histogram, kernel	2	lecture
4	Hypothesis testing: testing Normality, comparing distributions	2	lecture
5	Analysis of empirical data: Task 1	2	lecture
6	Correlation analysis	2	lecture
7	Linear regression model: parameter estimation	2	lecture

8	Linear regression model: model specification and verification	2	lecture
9	Analysis of empirical data: Task 2	2	lecture
10	Autoregressive model (ARX)	2	lecture
11	Point forecasting – forecast evaluation	2	lecture
12	Quantile regression	2	lecture
13	Probabilistic forecasting – forecast evaluation	2	lecture
14	Analysis of empirical data: Task 3	2	lecture
15	Discussion: recent advances in econometrics	2	lecture

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

Basic background in mathematics and statistics

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	<i>KNOWLEDGE. Doctoral student knows and understands:</i>	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	<input type="checkbox"/>
SzD_W4	research methodology;	<input checked="" type="checkbox"/>
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	<input type="checkbox"/>
SzD_W6	the fundamental dilemmas of modern civilization;	<input type="checkbox"/>
SzD_W7	the legal and ethical conditions of scientific activity;	<input type="checkbox"/>
SzD_W8	the economic and other relevant conditions of scientific activity;	<input type="checkbox"/>
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	<input type="checkbox"/>
	<i>SKILLS. Doctoral student is able to:</i>	
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	<input checked="" type="checkbox"/>

SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	<input type="checkbox"/>
SzD_U4	disseminate research results, including in popular forms;	<input type="checkbox"/>
SzD_U5	initiate debates and participate in a scientific discourse;	<input type="checkbox"/>
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	<input type="checkbox"/>
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	<input type="checkbox"/>
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	<input type="checkbox"/>
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	<input type="checkbox"/>
<i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>		
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	<input checked="" type="checkbox"/>
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	<input type="checkbox"/>

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

Reports

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

Multimedia presentations, own work

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

BASIC LITERATURE:

- [1] Hyndman, R.J., & Athanasopoulos, G. (2018) *Forecasting: principles and practice*, 2nd edition, OTexts: Melbourne, Australia. OTexts.com/fpp2.
- [2] William H. Greene (2012) *Econometric Analysis*, 7th edition, Pearson Education Limited

ADDITIONAL LITERATURE:

- [1] Handbook of Economic Forecasting (2006), Graham Elliott, Clive William John Granger, Allan Timmermann (eds.), North Holland

- [2] Handbook of Computational Statistics (2004), J. E. Gentle, W. Härdle, Y. Mori (eds.), Springer-Verlag Berlin Heidelberg
- [3] Francis X. Diebold and Roberto S. Mariano (1995), Comparing Predictive Accuracy, *Journal of Business & Economic Statistics*, Vol. 13, No. 3, (Jul., 1995), pp. 253-263
- [4] J. Nowotarski, R. Weron (2018) *Recent advances in electricity price forecasting: A review of probabilistic forecasting*, *Renewable and Sustainable Energy Reviews* 81(1), 1548-1568
- [5] Clive W.J. Granger, Yongil Jeon (2007) Long-term forecasting and evaluation, *International Journal of Forecasting* 23 (2007) 539–551
- [6] R. Weron (2014) *Electricity price forecasting: A review of the state-of-the-art with a look into the future*, *International Journal of Forecasting* 30(4),

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

Language: English
