

COURSE CARD

1. Basic information

Course name in English:	Space technologies and space resources	
Course name in Polish:	Technologie przemysłu kosmicznego i zasoby pozaziemskie	
Number of hours:	15	
Type of course:	Elective course	
Form of course:	mixed forms (combination of lecture, seminar and laboratory)	
Code of course:		
Course leader:	<i>dr hab. inż. Damian Pietrusiak</i>	
Faculty of the course leader:	W10 Faculty of Mechanical Engineering	
Email address of the course leader:	damian.pietrusiak@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	<input checked="" type="checkbox"/>
	Automation, electronic, and electrical engineering	<input checked="" type="checkbox"/>
	Information and communication technology	<input checked="" type="checkbox"/>
	Biomedical engineering	<input checked="" type="checkbox"/>
	Chemical engineering	<input checked="" type="checkbox"/>
	Civil engineering and transport	<input checked="" type="checkbox"/>
	Mechanical engineering	<input checked="" type="checkbox"/>
	Environmental engineering, mining, and energy	<input checked="" type="checkbox"/>
	Mathematics	<input checked="" type="checkbox"/>
	Chemical sciences	<input checked="" type="checkbox"/>
	Physical sciences	<input checked="" type="checkbox"/>
	Management and quality studies	<input checked="" type="checkbox"/>

2. Objectives

- I. New Space – ability to describe recent trends in the development of the space technologies
- II. Space applications – ability to identify space related technologies, its origin and possible terrestrial and extraterrestrial application
- III. Space resources – ability to describe space resources and related technologies

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Introduction	1	lecture
2	Space environment	2	lecture
3	Space missions – directions, objectives and required technologies	2	lecture
4	Space resources – identification of resources and required technologies	2	lecture
5	New Space – definitions and key concept identification	2	lecture
6	Space applications - space related technologies and its terrestrial and extraterrestrial application	2	lecture
7	Space applications - space related technologies and its terrestrial and extraterrestrial application	2	lecture
8	Students presentation	2	seminar

12			Select form
13			Select form
14			Select form
15			Select form

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

- General knowledge in the field of individual expertise/discipline

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	<i>KNOWLEDGE. Doctoral student knows and understands:</i>	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	<input checked="" type="checkbox"/>
SzD_W4	research methodology;	<input checked="" type="checkbox"/>
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	<input type="checkbox"/>
SzD_W6	the fundamental dilemmas of modern civilization;	<input type="checkbox"/>
SzD_W7	the legal and ethical conditions of scientific activity;	<input type="checkbox"/>
SzD_W8	the economic and other relevant conditions of scientific activity;	<input type="checkbox"/>

SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	<input checked="" type="checkbox"/>
<i>SKILLS. Doctoral student is able to:</i>		
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	<input checked="" type="checkbox"/>
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	<input checked="" type="checkbox"/>
SzD_U4	disseminate research results, including in popular forms;	<input checked="" type="checkbox"/>
SzD_U5	initiate debates and participate in a scientific discourse;	<input checked="" type="checkbox"/>
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	<input type="checkbox"/>
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	<input checked="" type="checkbox"/>
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	<input checked="" type="checkbox"/>
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	<input type="checkbox"/>
<i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>		
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	<input type="checkbox"/>
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	<input checked="" type="checkbox"/>

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

- During final class each student will give individual talk presenting recent space related technologies in their discipline – topics will be defined during semester with the assistance of tutor.

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

:

- Multimedia presentation
- Problem based learning
- Jigsaw
- Debate
- Socratic method
- Metacognitive questions
- Peer tutoring

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

1. Natural Resources Canada, Tutorial: Fundamentals of Remote Sensing, 2015.
<http://www.nrcan.gc.ca/earth-sciences/geomatics/satellite-imagery-air-photos/satellite-imageryproducts/educational-resources/9309>
2. Dator, J., 2011. Futures Studies. In: W.S. Bainbridge, Ed. Leadership in Science and Technology. Thousand Oaks, CA
3. Wertz JR and Larson WJ (eds.), Space Mission Analysis and Design (3rd Edition), Microcosm Press/Kluwer Academic Publishers, 1999, ISBN-13: 978-1881883104
4. Ryschkewitsch, Schaible and Larson, The Art and Science of System Engineering, 1999, NASA
5. Garvin, JB. The science behind the vision for U.S. space exploration: the value of a human–robotic partnership. Earth Moon Planets
6. Thirsk, R., A. Kuipers, C. Mukai and D. Williams. The space-flight environment: the International Space Station and beyond. Canadian Medical Association Journal 180(12): 1216-20 (2009)

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

Class language: English
