## 2. Objectives

C1 Acquire basic skill in using CAS Maple

C2 Acquire skills to use Maple for solving chosen problems in physics and for modeling of chosen phenomena and processes in physics

#### 3. Content

Detailed information about the course content, including topics and form of classes.

No.	Торіс	Number of	Form of classes
		hours	

Wrocław University of Science and Technology Doctoral School

1	Introduction into <i>Maple</i> : basic features of the programming language	6	lecture
2	Introduction into <i>Maple</i> : elementary applications in mathematics and physics	4	lecture
3	Variations on harmonic oscillator	4	lecture
4	Oregonator: chemical reactions with oscillations	2	lecture
5	Mathieu's oscillator, parametric resonance	2	lecture
6	Phase portraits. Van der Pol's limit cycle	2	lecture
7	Period doubling and chaos: Duffing's equation	2	lecture
8	Van der Pol's equation: chaos.	2	lecture
9	Calculus of variations: Fermat's principle, chaotic pendulum, geodesics	3	lecture
10	Partial differential equations: string oscillations, diffusion	3	lecture

## 4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

- 1. Basic programming skills
- 2. Basic English language

#### 5. Learning outcomes

*List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).* 

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered	
	in the curricula;	
SzD_W4	research methodology;	$\boxtimes$
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	
SzD_W6	the fundamental dilemmas of modern civilization;	
SzD_W7	the legal and ethical conditions of scientific activity;	
SzD_W8	the economic and other relevant conditions of scientific activity;	
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and	
	commercialisation of results of scientific activity and know-how related to these	
	results.	
	SKILLS. Doctoral student is able to:	
SzD_U2	use knowledge from different fields of science or art to creatively identify,	
	formulate and innovatively solve complex problems or perform research tasks, in	
	particular:	
	- define the purpose and subject of scientific research, formulate a research	
	hypothesis,	
	<ul> <li>develop research methods, techniques and tools, and use them creatively,</li> </ul>	

Wrocław University of Science and Technology Doctoral School

- draw conclusions on the basis of scientific research;	
transfer the results of scientific activities to the economic and social spheres;	
communicate on specialised topics to the extent that they enable an active	
participation in the international scientific community;	
disseminate research results, including in popular forms;	
initiate debates and participate in a scientific discourse;	
be able to speak a foreign language at B2 level of the Common European	
Framework of Reference for Languages to a level that enables them to participate	
in the international scientific and professional environment;	
plan and implement an individual or collective research or creative activity,	
including in an international environment;	
independently plan and act for one's own development and inspire and organize	
the development of others;	
plan classes or groups of classes and implement them using modern methods and	
tools.	
SOCIAL COMPETENCES. Doctoral student is ready to:	
fulfilling the social obligations of researchers and creators, initiate public interest	
activities, thinking and acting in an entrepreneurial way;	
maintaining and developing the ethos of research and creative environments,	
including:	
- carrying out scientific activities in an independent manner,	
- respecting the principle of public ownership of research results, taking into	
account the principles of intellectual property protection.	
	critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres; communicate on specialised topics to the extent that they enable an active participation in the international scientific community; disseminate research results, including in popular forms; initiate debates and participate in a scientific discourse; be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment; plan and implement an individual or collective research or creative activity, including in an international environment; independently plan and act for one's own development and inspire and organize the development of others; plan classes or groups of classes and implement them using modern methods and tools. SOCIAL COMPETENCES. Doctoral student is ready to: fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way; maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into

## 6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

Examination (presentation), discussion during the lecture, computer lab activities during the lecture

## 7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

N1. Lecture

N2. Computer lab (during the lecture)

#### 8. Literature

*List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.* 

[1] R.H. Enns, *Computer Algebra Recipes for Mathematical Physics* (Birkhauser, Boston, 2005)

- [2] R.H. Enns, G.C. McGuire, *An Advanced Guide to Scientific Modeling* (Springer, New York, 2007)
- [3] A.C. MituŚ, R. Orlik, G. Pawlik, *Wstęp do pakietu algebry komputerowej Maple* (Oficyna Wydawnicza DWSPiT, Polkowice, 2010)

#### 9. Other remarks

Additional remarks, comments, (e.g., language of the course)
