

COURSE CARD

1. Basic information

Course name in English:	Recent research trends in automation, electronic, electrical engineering and space technologies	
Course name in Polish:	Najnowsze kierunki badań w dyscyplinie automatyka, elektronika, elektrotechnika i technologie kosmiczne	
Number of hours:	30	
Type of course:	Recent research trends in discipline	
Form of course:	lecture	
Code of course:	W05AEE-SD0001W/AEQ100289W	
Course leader:	dr hab. inż. Przemysław Janik	
Faculty of the course leader:	W5 Faculty of Electrical Engineering	
Email address of the course leader:	przemyslaw.janik@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	<input type="checkbox"/>
	Automation, electronic, electrical engineering and space technologies	<input checked="" type="checkbox"/>
	Information and communication technology	<input type="checkbox"/>
	Biomedical engineering	<input type="checkbox"/>
	Chemical engineering	<input type="checkbox"/>
	Civil engineering, geodesy and transport	<input type="checkbox"/>
	Materials engineering	<input type="checkbox"/>
	Mechanical engineering	<input type="checkbox"/>
	Environmental engineering, mining, and energy	<input type="checkbox"/>
	Mathematics	<input type="checkbox"/>
	Chemical sciences	<input type="checkbox"/>
	Physical sciences	<input type="checkbox"/>
	Management and quality studies	<input type="checkbox"/>

2. Objectives

- Acquainting PhD students with the latest research directions in the discipline of automation, electronic, electrical engineering and space technologies.
- Acquainting PhD students with the scientific and research laboratories available at the University or at Partner Institutions as well as its technological and measurement possibilities
- Conducting an interdisciplinary discussion

3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
-----	-------	-----------------	-----------------

1	Introduction to the lecture activities, criteria for results evaluation and final grade	2	lecture
2	Department of Acoustics, Multimedia and Signal Processing	2	lecture
3	Department of Cybernetics and Robotics	2	lecture
4	Department of Electronic and Photonic Metrology	2	lecture
5	Department of Field Theory, Electronic Circuits and Optoelectronics	2	lecture
6	Summary and interdisciplinary discussion	2	lecture
7	Department of Electrical Engineering Fundamentals	2	lecture
8	Department of Electrical Power Engineering	2	lecture
9	Department of Electrical Machines, Drives and Measurements	2	lecture
10	Summary and interdisciplinary discussion	2	lecture
11	Department of Microelectronics and Nanotechnology	2	lecture
12	Department of Microsystems	2	lecture
13	Department of Nanometrology	2	lecture
14	Summary and interdisciplinary discussion	2	lecture
15	Closing unit	2	lecture

4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

Basic knowledge of automation, electronics and electrical engineering
Basic knowledge of mathematics and physics
English language

5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered in the curricula;	<input checked="" type="checkbox"/>
SzD_W4	research methodology;	<input type="checkbox"/>
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	<input type="checkbox"/>
SzD_W6	the fundamental dilemmas of modern civilization;	<input checked="" type="checkbox"/>
SzD_W7	the legal and ethical conditions of scientific activity;	<input type="checkbox"/>
SzD_W8	the economic and other relevant conditions of scientific activity;	<input type="checkbox"/>
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and commercialisation of results of scientific activity and know-how related to these results.	<input type="checkbox"/>

<i>SKILLS. Doctoral student is able to:</i>		
SzD_U2	use knowledge from different fields of science or art to creatively identify, formulate and innovatively solve complex problems or perform research tasks, in particular: - define the purpose and subject of scientific research, formulate a research hypothesis, - develop research methods, techniques and tools, and use them creatively, - draw conclusions on the basis of scientific research; critically analyse and evaluate the results of scientific research, expertise and other creative work and their contribution to knowledge development; transfer the results of scientific activities to the economic and social spheres;	<input type="checkbox"/>
SzD_U3	communicate on specialised topics to the extent that they enable an active participation in the international scientific community;	<input type="checkbox"/>
SzD_U4	disseminate research results, including in popular forms;	<input type="checkbox"/>
SzD_U5	initiate debates and participate in a scientific discourse;	<input type="checkbox"/>
SzD_U6	be able to speak a foreign language at B2 level of the Common European Framework of Reference for Languages to a level that enables them to participate in the international scientific and professional environment;	<input type="checkbox"/>
SzD_U7	plan and implement an individual or collective research or creative activity, including in an international environment;	<input type="checkbox"/>
SzD_U8	independently plan and act for one's own development and inspire and organize the development of others;	<input type="checkbox"/>
SzD_U9	plan classes or groups of classes and implement them using modern methods and tools.	<input type="checkbox"/>
<i>SOCIAL COMPETENCES. Doctoral student is ready to:</i>		
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest activities, thinking and acting in an entrepreneurial way;	<input type="checkbox"/>
SzD_K4	maintaining and developing the ethos of research and creative environments, including: - carrying out scientific activities in an independent manner, - respecting the principle of public ownership of research results, taking into account the principles of intellectual property protection.	<input type="checkbox"/>

6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

- Composition of a review type essay on a selected subject addressing recent developments in the specific research field and covering min. 10 references,
- Participation,
- Contribution to discussion

7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

- Multimedia presentation
- Discussion

8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

Literature and reading materials related to latest research activities and specific for all participating Departments

9. Other remarks

Additional remarks, comments, (e.g., language of the course)

Lecturers from Industry and cooperating Higher Education Institutions may be invited to contribute to the lecture and share experiences and knowledge with PhD students
