

### **COURSE CARD**

# 1. Basic information

Course name in English:	Finite Element Analysis in Practice	
Course name in Polish:	Metoda Elementów Skończonych w zastosowaniu	
Number of hours:	15	
Type of course:	Elective course	
Form of course:	laboratory	
Code of course:		
Course leader:	dr hab. inż. Damian Pietrusiak	
Faculty of the course leader:	W10 Faculty of Mechanical Engineering	
Email address of the course leader:	damian.pietrusiak@pwr.edu.pl	
Scientific discipline(s) assigned to the course (doctoral students representing the marked disciplines can participate in the course):	Architecture and urban planning	
	Automation, electronic, and electrical engineering	×
	Information and communication technology	
	Biomedical engineering	$\boxtimes$
	Chemical engineering	
	Civil engineering and transport	×
	Mechanical engineering	⊠
	Environmental engineering, mining, and energy	×
	Mathematics	
	Chemical sciences	
	Physical sciences	×
	Management and quality studies	

# 2. Objectives

- I. Task formulation ability to analyse the phenomena and properly classify the problem to solve with use of Finite Element Method: linear, nonlinear, buckling etc.
- II. Finite Element model preparation ability to develop proper discrete model (geometry selection, finite element type selection, interactions selection etc.) dedicated to the specified problem/solver
- III. Critical evaluation assessment of the obtained simulation results and ability to formulate practical(real structure implementation) conclusions

### 3. Content

Detailed information about the course content, including topics and form of classes.

No.	Topic	Number of hours	Form of classes
1	Fundamental software skills - Abaqus	2	laboratory
2	Linear static problem – model definition	2	laboratory
3	Linear static problem – analysis and results interpretation	2	laboratory
4	Nonlinear static problem – analysis and results interpretation	2	laboratory
5	Explicit dynamics	2	laboratory
6	Linear buckling analysis	2	laboratory
7	Coupled temperature-displacement analysis	2	laboratory
8	Quiz.	1	Select form
9			Select form
10			Select form
11			Select form
12			Select form
13			Select form
14			Select form
15			Select form

# 4. Prerequisites

List of prerequisites relating to knowledge, skills and other competences for course participants.

#### Preferably:

- fundamentals of physics, mechanics and/or structural engineering
- basic skills in 3D modelling

# 5. Learning outcomes

List of learning outcomes at level 8 of the Polish Qualifications Framework assigned to the course (mark the learning outcomes in the last column).

Symbol	Learning outcome	
	KNOWLEDGE. Doctoral student knows and understands:	
SzD_W3	the main trends in the development of the scientific or artistic disciplines covered	$\boxtimes$
	in the curricula;	
SzD_W4	research methodology;	X
SzD_W5	the rules for the dissemination of scientific results, including in open access mode;	
SzD_W6	the fundamental dilemmas of modern civilization;	
SzD_W7	the legal and ethical conditions of scientific activity;	

SzD_W8	the economic and other relevant conditions of scientific activity;	
SzD_W9	basic principles of knowledge transfer to the economic and social spheres and	
	commercialisation of results of scientific activity and know-how related to these	
	results.	
	SKILLS. Doctoral student is able to:	
SzD_U2	use knowledge from different fields of science or art to creatively identify,	×
	formulate and innovatively solve complex problems or perform research tasks, in	
	particular: - define the purpose and subject of scientific research, formulate a research	
	hypothesis,	
	- develop research methods, techniques and tools, and use them creatively,	
	- draw conclusions on the basis of scientific research;	
	critically analyse and evaluate the results of scientific research, expertise and	
	other creative work and their contribution to knowledge development;	
SzD_U3	transfer the results of scientific activities to the economic and social spheres; communicate on specialised topics to the extent that they enable an active	$\boxtimes$
320_03	participation in the international scientific community;	
SzD_U4	disseminate research results, including in popular forms;	
SzD_U5	initiate debates and participate in a scientific discourse;	$\boxtimes$
SzD_U6	be able to speak a foreign language at B2 level of the Common European	
	Framework of Reference for Languages to a level that enables them to participate	
	in the international scientific and professional environment;	
SzD_U7	plan and implement an individual or collective research or creative activity,	
C=D 110	including in an international environment; independently plan and act for one's own development and inspire and organize	$\boxtimes$
SzD_U8	the development of others;	
SzD_U9	plan classes or groups of classes and implement them using modern methods and	
	tools.	
	SOCIAL COMPETENCES. Doctoral student is ready to:	
SzD_K3	fulfilling the social obligations of researchers and creators, initiate public interest	
	activities, thinking and acting in an entrepreneurial way;	
SzD_K4	maintaining and developing the ethos of research and creative environments,	
	including: - carrying out scientific activities in an independent manner,	
	- respecting the principle of public ownership of research results, taking into	
	account the principles of intellectual property protection.	

# 6. Evaluation

Short description of the method(s) used to evaluate the learning outcomes assigned to the course, e.g., exam, test, report, presentation, etc.

#### :

- Presence
- Class activity
- Final quiz

# 7. Teaching methods

Short description of the teaching methods used during the course, e.g., multimedia presentation, discussion, literature studies, developing written documents, own work, etc.

:

- Multimedia presentation
- Problem based learning
- Jigsaw
- Debate
- Socratic method
- Metacognitive questions
- Peer tutoring
- Computer Aided Engineering (CAE)

#### 8. Literature

List of primary and secondary literature used to prepare the course and including additional knowledge for participants, e.g., books, textbooks, research papers, standards, web pages, etc.

#### Primary:

1. Robert D. Cook, David S. Malkus, Michael E. Plesha, Robert J. Witt, *Concepts and Applications of Finite Element Analysis*, Wiley; 2001

### Secondary:

- 1. K.J. Bathe, Finite Element Procedures, Klaus-Jurgen Bathe, 2006
- 2. Nitin S.Gokhale, Practical Finite Element Analysis, Finite To Infinite; 2008
- 3. Abagus Manual

### 9. Other remarks

Additional remarks, comments, (e.g., language of the course)

Class language: English Software: Abaqus
