2. Dyscyplina automatyka, elektronika i elektrotechnika

Nguyen Xuan Tham

Wynik oceny: POZYTYWNY

Uzasadnienie oceny:

The Mid-term Evaluation Committee met remotely via the ZOOM platform on 22 02 2022. at 10:00. A PhD student was invited to the meeting. He presented his research achievements and further plans connected with this activity. After getting acquainted with the IPB plan and the report on its implementation, the commission assesses the doctoral student's progress positively. At the same time, the commission states that the proposed research topic and theses put forward are actual and important. The issue is related to the scientific discipline of automation, electronic and electrical engineering.

Within 4 semesters, the PhD student completed the tasks included in the research plan, and actively participated in the research team of professor Robert Lis. According to the evaluation committee, the student has a chance to achieve the set research goals within the next 2 years.
